Req 225: the window beside Neville's bed

The Architect, 13 October 2026, for Godric. The Dormitory found OotP 29's window is W2 on the page, not W1 where the grounds put the beech (req 198, your 4.1). Plans north up; the grounds 1:4000, the room 1:200.

Canon, checked at the gate: "Neville's snuffling snores from the corner" (CoS 15); "moved across to the window beside Neville's bed ... Directly ahead of him, Harry could see the towering beech tree" (OotP 29); "a large beech tree on the edge of the lake" (OotP 17, again OotP 28, 31).

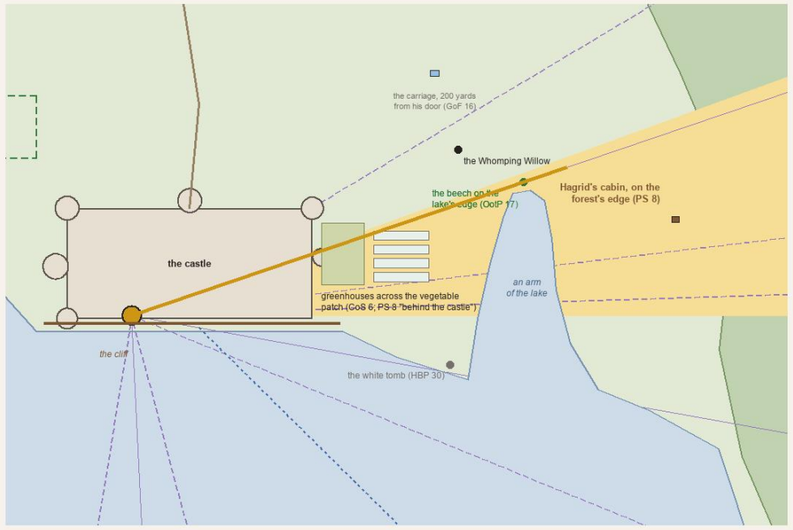

Now: the beech on W1's axis; Neville's corner bed is beside W2

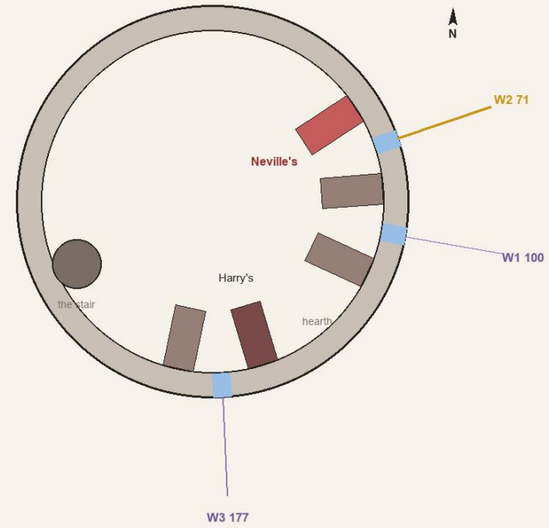

The beech 270 m out at 100 degrees, on W1's axis; W2 (71) is beside the corner bed and looks north of the lake, so OotP 29's "directly ahead" falls on the wrong window. The room as it stands (the shot below, 8.28 am).

225.1 The beech on W2's axis, at the head of an arm of the lake

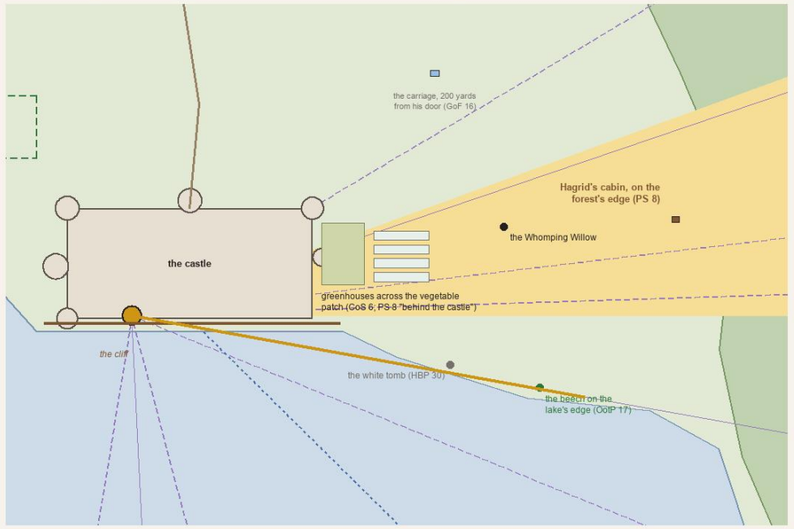

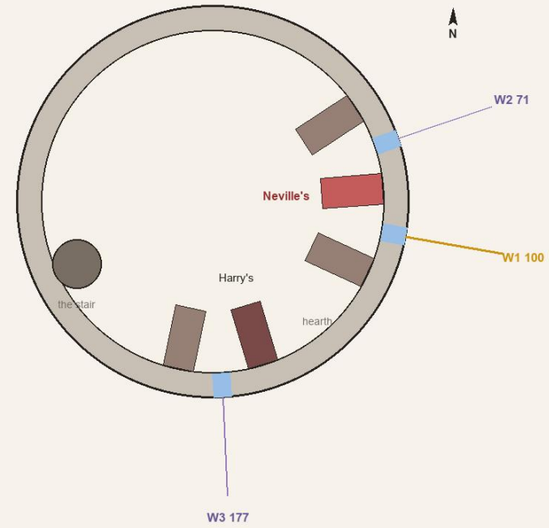

Keeps every book line: the corner bed (CoS 15), the window beside it, the beech "directly ahead" (OotP 29) on the lake's edge (OotP 17), Hagrid's cabin as before at 80 degrees, 9 degrees right of the axis, into the April sunrise; W2 already reads "the lake".
Costs: a lake arm 140 m north to the beech, the Whomping Willow (proposed) moved about 60 m north-west, clear of it; nothing on the page moves.

recommended

225.2 The grounds as now; Neville's bed moved to bed-3, by W1

The beech stays on W1's axis; bed-3 stands between W1 and W2, 14.5 degrees from each, so W1 is "beside" it. Loses CoS 15's "from the corner" (bed-3 is mid-row) and moves the snore, the stir and the night order on the Dormitory's page.

Now, the room from the stair head turned left (8.28 am): W2 beside the corner bed, W1 beyond
